University Application Support & Mentoring

**Your winning
application
starts here**

Our personal student-centred service supports you all the way through your university application process. From choosing the right university and course to submitting a winning application, we are here for you at every step.

Supporting Your Success

Choosing the right course for you

With a large number of degree courses in the UK to choose from, we can help you evaluate options, ensuring you select the right subject that will stimulate you and provide that important first step to a rewarding career.

Selecting the best university to fulfil your potential

UK universities have a world-class reputation and some of the top rankings globally. We help you to make your university choice that will both inspire you, as well as provide an environment for you to flourish.

Submitting a winning application

We support you through each step of the application process, working with you to understand your strengths, and increasing your confidence to help you submit a winning application.

Excelling in your studies

Securing your place is just the beginning. Once you start your course we can continue to support you throughout your studies via our individually tailored mentoring programme.

We take a personal one-to-one approach led by you and recognise that no two students are the same. We support you and your family to make the best decision to match your needs and interests and help you through every step of your university journey. We can help you with both undergraduate and postgraduate studies, assisting you to secure the right degree course for you so you can succeed in your studies.

“Uni Direct helped me hugely in the process of applying to this university” Seb, University of Exeter
