## Medical Application Support

With medicine advancing rapidly and a global shortage of medical professionals, a career in medicine offers a wealth of different opportunities and specialisms. The application process can be daunting in both selecting the right course and submitting a winning application.

# Medical Application Support

Your first vital step is securing your university place, which is highly competitive and different to other degrees. Uni Direct's team of medical practitioners and application specialists can help you through each step of your journey, supporting you to succeed in your application.

## Making your choice

Our medical specialists have both the academic and practical experience of working in medicine to help you navigate the wide range of pathways, courses and universities in both the UK and Europe. We can work with you to ensure you apply to the best courses and universities for you, taking into consideration your preferences and the varying entry requirements.

## Application process

Our team includes medical practitioners who can support you throughout each stage of the application process. Your application is not just about meeting the academic entry requirements for medicine, it also involves admission tests and demonstrating your passion and commitment as a future student to your chosen university. It is never too early to get in touch and start planning the vital parts of your application - we provide consultations for students aged 15 years and upwards aspiring to study medicine. Starting early gives you time to prepare your application in order to gain the necessary broad range of work experience and voluntary work.

Applying for medicine in the UK is done through a unique centralised process called UCAS. It has strict deadlines and you need to apply earlier than for other degrees. Uni Direct will guide you through each step of this process, ensuring you submit the very best application, before the deadline.

## Admission tests

Applications to study medicine are often supported by specific admission tests, such as the BMAT and UKCAT. These vary depending on university and can be complex to navigate. We are able to advise you on which tests are relevant and support your preparation work.

## Interviews and beyond

You are likely to be invited to an interview as part of your application process. We can support you in your preparation for this. Using Skype or other platforms, we are able to run through practice questions and discuss other topics, which may come up in the interview. Post interview we can help you if there are any further decisions to make, as well as with that all-important preparation for life at your chosen university.

## Other healthcare courses

There are many other career routes available in healthcare, some of which allow you to alter your path during your studies. Uni Direct can work with you with a range of other options including:

- ◆ Dentistry, veterinary science, nursing, midwifery, or physiotherapy
- ◆ Studying in Europe
- ◆ Work placements
- ◆ Foundation years
- ◆ Postgraduate courses
- ◆ Mentoring and support during your studies

Please contact Uni Direct if you would like to discuss your options. Ensuring you have the time to submit a compelling application is key, so the sooner we can discuss your specific requirements the better.
